There are many ways to do this, the easiest being in the LAYER page. Using your CHAN/BANK-Layer/Zone buttons, scroll to layer 3. The IDC survey found that companies believe they use just 16 percent of the software they buy. Answer: Please Note: screen shots are intended as a rudimentary guide, not a verbatim match for what you may see on your unit. Select layer 1. We will assign the Bass to the Controller slider in much the same way. There are many output configurations possible; for a more detailed explanation, refer to your printed owners manual. But when the IT executives were asked whether they wanted CRM as a service or wanted to own it, the numbers reversed. Press the [more->] soft key until you see the F4 AMP btton and press it. Play and enjoy the auto-stereo panning on the Elec Piano. If you wanted to adjust it, just press the DOWN CHAN/BANK-Layer/Zone button to take you to the Dual Elec Piano (1/3) amplifier page and make your boost or cut. K2000/2500 models screens may appear slightly different. Donations will also open the way for later additions, such as synth chip data- sheets, synthesizer spec sheets, etc. You can enter the value the keyboard or just use the alpha wheel and set the transpose to 12 ST. When you want to create a multi-layered program, as we will be here, you have four options to manage your layers, available as soft buttons in the Program editor. To see the other layers (only layer 1 in this case), simply press any of the Layer/Zone buttons (aka Chan/Bank) to the left of the display. With business software so hard to sell today, suppliers are discounting the material in front and building their profits in the back end. So here is a site with only high quality manuals, high service resolution, most of them carefully clean, restored and sometimes partially re-drawn. What do you think? To get a .pdf file of the schemes contact us and ask for the schematic set K2500. KURZWEIL MUSIC SYSTEMS And Music Corp 9501 Lakewood Drive, SW Ste. So instead, we will assign the Mod Wheel to gradually turn and down the volume of the strings instead of just out and over. If you want to change the amount of panning, go back to the F3 Pos Page and readjust the 100% depth to whatever you want. Sliding control will appear up and down the bass volume, and the mod mod will appear up and down the strings. As an example of work, we will create a program that will take us around a K2 layer a little. Using your cursor, highlight lokey and using your alpha wheel define to C4. In this way it is functional, but not very expressive, as this only works as an on/off switch. Did you hear the difference?
